

## Zoom Webinar – Expert reviews "Refactoring using Imagix 4D"

Specialists from Verifysoft Technology will take you through Imagix 4D to demonstrate how to protect investments continuous refactoring is essential to increase lifetime of software applications.

The webinar will give you information about the essential role of Refactoring.

Program (40 Minutes):

Short Introduction

Purpose of refactoring.

Approach to refactoring.

Refactoring Legacy Code

Challenges of refactoring

Imagix 4D & Refactoring

Expert reviews on the Webinar "Refactoring using Imagix 4D ":

### 1. What are we going to talk about concretely?

*"Definition, reason, approaches, challenges of refactoring. Introduction of Imagix4D and why it is useful for refactoring." Jan-David Baltzer – Technical Support Static Code Analysis Tools by Verifysoft Technology*

### 2. What are the objectives of this multi-media seminar format?

*"Inform the audience about how Imagix 4D can improve their refactoring and why." Jan-David Baltzer – technical Support Static Code Analysis Tools by Verifysoft Technology*

### 3. Who is the target audience?

*"Everyone working with sourcecode or deciding about resources for software projects." Jan-David Baltzer – Technical Support Static Code Analysis Tools by Verifysoft Technology*

#### **4. Prerequisites are obliged for participation?**

“Basic understanding of software and development processes.” *Jan-David Baltzer – Technical Support Static Code Analysis Tools by Verifysoft Technology*

#### **5. What are the benefits of this web-conference?**

“All the Knowledge about chances and benefits of the use of Imagix 4D for refactoring.” *Jan-David Baltzer – Technical Support Static Code Analysis Tools by Verifysoft Technology*

#### **6. At the end of this training, what are the notions acquired by the participant?**

“Refactoring is omnipresent in software development. Imagix 4D is the tool of choice to understand, query and rate software to improve not only the overall refactoring process.” *Jan-David Baltzer – Technical Support Static Code Analysis Tools by Verifysoft Technology*
