## Testwell CTC++

*New in 2024!*

### New Version Testwell CTC++ 10.2

In version 10.1 of Testwell CTC++, the new feature 'Justifications' was introduced, allowing missing coverage to be justified. These justifications transparently influence all coverage measures. In the latest version 10.2, this has been complemented by the new feature 'Merging', which enables the merging of coverage results from different source code variants.

### TÜV certificate for Testwell CTC++ 10.2

In December 2024, Testwell CTC++ version 10.2 was certified by TÜV SÜD. The certification confirms that the software can be used in safety-critical software development without further qualification measures for all safety levels of the IEC 61508, ISO 26262, EN 50716 and IEC 62304 standards. To this end, Verifysoft provides a safety package which contains, in addition to the certificate, supplementary

documents such as a safety manual and access to the known bugs list.
