New in 2025!

CodeSentry 7.1 SaaS

CodeSentry 7.1 SaaS has been officially released and is now available exclusively in the SaaS form. For On-Prem evaluation requests, version 7.0 will be provided, while SaaS requests will be fulfilled with version 7.1. When version 7.2 is released, it will support both deployment options. This release introduces the new SBOM Policy engine, which automates the exclusion of components based on match confidence. This feature simplifies SBOM generation by reducing false positive detections.

New in 2025!

CodeSonar 9.0

CodeSecure has released version 9.0 of its static code analysis tool, CodeSonar. The focus of this release is a significant performance improvement in the MISRA analysis, enabling analyses that previously took several hours to be completed in less than 30 minutes. Additionally, the coverage of the MISRA C 2023 standard has been increased to 97%, and the coverage of the AUTOSAR 14 standard has also been improved. Android 14 and 15 are now supported as well.

New in 2025!

Codee 2024.4

The latest version of Codee, 2024.4, is now available. This release introduces new AutoFixes to enhance code correctness, modernise legacy code and improve performance. Major updates include support for Intel ifx compiler flags, an upgraded LLVM toolchain (version 20.0.0), and improved Fortran multithreading with a new "native" option using ``do concurrent``.
