Testwell CTC++

New in 2026! **Version 10.3.0**

Verifysoft has released version 10.3 of the code coverage analyzer Testwell CTC++. The new version extends reporting with the new feature “User Variables.” This feature allows arbitrary textual information to be added using simple key-value pairs. In addition, version 10.3 now provides a mechanism to shorten source code paths during instrumentation without affecting the interoperability of the Testwell CTC++ toolchain between Windows and Linux.

New in 2026!

AdaCore and CodeSecure have merged

CodeSecure, whose product “CodeSonar” we distribute in the DACH region, is now part of AdaCore. The merger creates a joint company with a clear focus on software security, reliability, and quality in safety-critical applications. AdaCore brings its many years of experience in high-integrity software development to the table, while CodeSecure stands for powerful static analysis with CodeSonar.
